Care	Information	<p>Non Durably Flame Retardant. This means that the fabric is chemically treated and if wet in any way should be retreated to meet the flammability requirements of BS5867 Part 2 Type B.</p> <p>Therefore, the cloth will not withstand wet cleaning and should be re-flame proofed whenever wet. The cloth can be professionally dry cleaned using the correct chemical process.</p> <p>Not withstanding the aforementioned it would be our advice to only dry clean this material periodically. We would suggest that the curtain be soft brushed on a regular basis and periodically cleaned using a vacuum and drapery attachment. Commercial flame retardants may alter the aesthetics, appearance, colour or performance of the textile material</p> <p>This fabric is not pre-shrunk.</p>
