## Technology

Bespoke Fabric Shapes

Over Stage Engineering

# Big Chill, King's Cross, London, UK

## Summary

B3 Designers Ltd approached J&C Joel on behalf of Big Chill, a brand new hot spot located in the heart of King Cross. We were commissioned to create a large canopy, which would be used as a feature piece on the venue's ground floor.

The canopy consisted of ten unique panels, all at 100% fullness and finished with rufflette tape, as well as having ties on each end to help create the ruched effect. Our incredible design team also created the silhouette and pattern for the canopy. The piece was then suspended onto a segmented frame, which was fixed to the ceiling with eyebolts, all of which were installed by our site engineers.
